Shame on Western Province

Letter of the day

WHAT a shame on Western Provincial Administration who were not able to make a comprehensive presentation during the 2011 Southern Regional Intergovernmental and Service Delivery workshop.

Why didn't they make a presentation? Simple, they had nothing to present because there is barley any evidence of tangible developments taking place in the province with the K200 million or so given to the province last November.

Where is all that money? Is the Governor using it somewhere else? If there is any development happening in the province that we the people of Western Province do not know about? I welcome the Governor and his Provincial Administrator to advertise in the

dailies their funded projects so far across the breath of this vast province. This is so that we are aware.

The National Economic Fiscal Commission (NEFC) monitors the use of National grants and more broadly identifies financial impediments to service delivery in all districts in PNG. Moreover, it investigates and compiles data highlighting recurring issues that provincial administration needs to consider and address which was its purpose of establishment.

Drawing from that characterisation of NEFC, we all can be aware that every year, after their investigations, they advise all the districts in PNG of their shortfalls in implementing their grants.

Illustration from that, why has Western Province failed miserably year after year when they have been advised on their weaknesses

or recommendations by NEFC. This is a very sad scenario. The Governor, the three MPs and their incompetent staff should go. We do not need them when our province is not showing any signs of moving forward when we measure development indicators.

Western Province citizens and its elite should wake up from their long sleep and see through the eyes of their province's development perspective and make better judgment for the good of our province.

We and our brother, the Gulf province, can not always race for the poorest performing province flag yearly. It is time we pass it to another province!

ESP graduate development scheme?

CAN someone from East Sepik or elsewhere tell me if Arthur Somare has initiated Graduate Development Scheme for the Sepiks coming out from tertiary institutions?

I heard of the scheme during my third year of study at UPNG — four years back. Now am in a job search queue and those graduated after me also joined the queue.

To my knowledge, there hasn't

been any restructure from the provincial administration right down to the district level to employ the graduates.

Please, Mr Governor, provincial administration and the MPs, get the province's elite back to the province to develop the province.

The country is into its peak of development and the province needs innovative, efficient and effective

workforce to drive the province forward to better achieve the country's vision.

Up to you ESP MPs, provincial and district administrations, either you employ new brains to drive the province forward or you keep the old rags with certificates and diplomas and drag the province backward.

Vira people bring real development

I WOULD like to tell the people of WNBWP that you don't talk too much garbage to people from other provinces who are holding the top position and working in the province as they are the ones who bring real

development but open your eyes and learn how to set up small businesses. If not, although you do have oil palm trees, you will still live like Kaulongs like your forefathers. You can prove it yourself that all the business in

the province are owned by Chinese and Koreans and a few Viras, yupela yet nogat na why talk too much on Vira people.
